

Letter from Alexander Graham Bell to John Wesley Powell, February 28, 1898, with transcript

Physics Copy of letter to Major J.W.Powell from Alexander Graham Bell , transmitting a manuscript on the subject of "The Conservation of Energy," , etc. 1331 Conn. Avenue, February 28, 1898. Dear Major Powell:

These are the old notes you desired to see. Mr. McCurdy has has no time to copy the parts you wanted — so I send the original for you to make such extracts from are you desire.

These are only fragmentary notes designed to form part of some publication upon the subject — but I have not yet reached the publication stage — although the notes were written quite a number of years ago.

Please return the whole when you have made such extracts as you need.

Yours sincerely, ALEXANDER GRAHAM BELL. Major Powell 910 M St.
